### Project Contacts

1. **Bovine Surveillance, Calf Post-mortem project** – Up to 60 more calves can be enrolled from dairy, cow-calf or veal operations. Information and required AHL submission forms for the project are on [www.oabp.ca](http://www.oabp.ca)  
Information how producers (non-dairy) can obtain a Premise Identification Number (PID) is at [https://www.ontariopr.com/home\\_en.html](https://www.ontariopr.com/home_en.html) . Dairy producers can find their PID on their own “dashboard” on the DFO website.
2. **Training producers to systematically evaluate cows** they want to remove from their herd. We want to enroll 20 veterinarians at these meetings who will each recruit 10 clients to participate in the pilot project. Contact Ann Godkin at [ann.godkin@ontario.ca](mailto:ann.godkin@ontario.ca) or Todd Duffield at [tduffiel@uoguelph.ca](mailto:tduffiel@uoguelph.ca)
3. **Focus groups to investigate producer-veterinarian communication** about animal care. Learn what your producer clients expect from you in terms of communicating about animal care issues. If you are interested in distributing focus group invitations to your clients, or including a short description of the project in your practice newsletter, contact Stephanie Croyle at [scroyle@uoguelph.ca](mailto:scroyle@uoguelph.ca)

***All presentations from the Vet Updates 2016 will be posted on the OABP website following the meetings.***
